The image shows a close-up, top-down view of a shower floor. The floor is composed of square tiles in various shades of blue and grey. In the center, there is a square drain grate with a decorative, sunburst-like pattern of teardrop-shaped holes. On the left side of the image, there is a splash of water with many bubbles, suggesting a shower in progress. The lighting is dramatic, with the tiles appearing to recede into the distance.

DUROCK™ SHOWER SYSTEM
GRATES

A SUPERIOR SHOWER SYSTEM
FROM A NAME YOU TRUST

USG

THE CENTERPIECE OF EVERY SHOWER

USG DUROCK™ DESIGNER AND PRO SERIES GRATES

Showers can do much more than just add value to a home. They can also be a dramatic statement that expresses a homeowner's individual style. Exclusively designed to work with the USG DUROCK™ Shower System, the Designer and Pro Series grates accentuate any shower. These 4" and 5" grates are available in a range of designs and finishes, so you can choose from more than 50 options to help you achieve your unique vision.

START WITH A GREAT FINISH

DESIGNER SERIES GRATES

From contemporary to classic, the Designer Series offers a range of stylish choices to fit your unique shower design. Plus, each grate is cut from a solid block of stainless steel or pure copper. The 3/16"-thick, stainless steel is optimized for high strength and corrosion resistance, and the reflective facets around each opening are meticulously crafted for the most discriminating high-end shower installations.

The 3/16"-thick copper Designer Series grates employ a process by which ORB patina is applied to enhance the natural beauty of the copper. Each facet around the openings uniquely reflects the variations in the copper, imparting a sculptural quality to each grate.

PRO SERIES GRATES

The Pro Series utilizes an extremely durable, high impact-resistant, engineering-grade polycarbonate base structure wrapped in stainless steel. They are equipped with a Physical Vapor Deposition (PVD) finish that is bonded to the stainless steel at the molecular level and provides trusted durability and extraordinary scratch and wear resistance.

THE SQUARE ADVANTAGE

USG DUROCK Designer and Pro Series grates are designed to work with square tiles. In fact, the 4" grates are sized to match standard 1/2", 1", 2", and 4" tile without any cutting required. This eliminates time-consuming trimming and grinding when installing round grates. And, if cuts are required, they are simple, straight cuts that require much less time.

USG DUROCK SHOWER SYSTEM GRATES

EASY TO INSTALL

- Elegant frameless grate for clean tiled appearance
- Friction fit means no screws are required

EASY TO MAINTAIN

- Provides years of service without corrosion or bending
- No special cleaning required
